

EQUINE ASSISTED LEARNING

Equine Assisted Learning (EAL) clients will team up with horses and equine experts who facilitate fun and enriching activities. Clients are guided through tailored lesson plans designed to promote knowledge-based and experiential learning while fostering creativity, critical thinking, and innovative problem-solving skills.

Our equine-assisted learning services provide new ways to navigate challenges, improve communication, and practice critical thinking and problem-solving. Each session seeks to spark creative and multifaceted thinking. Ultimately, the Ivey Ranch EAL experience is geared to promote physical, cognitive, emotional, and behavioral strength and well-being.
